

COVID Jabs Profoundly Destroy The Human Immune System, Turbo Cancer Is The Result

“Turbo” cancers and other unusual tumorous conditions appearing in “very strange” ways since COVID jabs were unleashed, warns Dr. Harvey Risch.

NaturalNews.com | Ethan Huff

A professor emeritus of epidemiology in the Department of Epidemiology and Public Health at the Yale School of Public Health and the Yale School of Medicine is speaking out about the horrors he and his colleagues are witnessing in patients previously "vaccinated" for the Wuhan coronavirus (COVID-19).

Dr. Harvey Risch, whom we have covered before, says that the number of "turbo cancers" is skyrocketing ever since the launch of Operation Warp Speed, a Trump administration scheme that fast-tracked COVID jabs into production and released them *en masse* under the guise of a "public health emergency."

Many of the people who got jabbed in obedience to both the Trump and Biden regimes now suffer from fast-moving cancers, Dr. Risch revealed in an interview with EpochTV's "American Thought Leaders" program. Because of how many "fully vaccinated" people now have turbo cancer, the next available appointment times at a major oncology clinic in New York extend *months* into the future rather than weeks.

Dr. Risch admits that it is somewhat difficult to observe the true cause of someone's cancer since cancer cells typically take a while to develop into detectable tumors. It can take up to 30 years, or perhaps as little as just a few years, for cancer to form depending on the type.

"What clinicians have been seeing is very strange things," Dr. Risch stated. "For example, 25-year-olds with colon cancer, who don't have family histories of the disease – that's basically impossible along the known paradigm for how colon cancer works – and other long-latency cancers that they're seeing in very young people."

In other words, the types of cancer that Dr. Risch and his colleagues are seeing do not follow the normal path of cancer development. Everything changed after Operation Warp Speed, and now speculation is growing among many that perhaps COVID injections are to blame.

"There has to be some initiating stimulus to why this happens," Dr. Risch said.

Because COVID jabs profoundly destroy the human immune system, cancer is the result

In normal, healthy, unvaccinated humans who eat right, get rest, stay hydrated, and avoid as many cancer-causing stimuli as they possible can, cancer has almost no chance to form because cancerous cells are easily destroyed by immune cells. In someone who is fully jabbed, it is a completely different story.

"That's the mechanism I think is most likely here," Dr. Risch explained. "We know that the COVID vaccines have done various degrees of damage to the immune system in a fraction of people who have taken them."

Another example Dr. Risch provided was breast cancer, which normally takes several decades to reoccur after surgical removal. However, in fully vaccinated women, the re-manifestation of breast cancers is occurring much more quickly over a much shorter period of time.

"Those are the initial signals that we've been seeing, and because these cancers have been occurring to people who were too young to get them, basically, compared to the normal way it works, they've been designated as turbo cancers," Dr. Risch explained.

"Some of these cancers are so aggressive that between the time that they're first seen and when they come back for treatment after a few weeks, they've grown dramatically compared to what oncologists would have expected for the way cancer normally progresses. Be attuned to your body."

Sadly, the extinction-level event (ELE) known as Operation Warp Speed has only just begun, and there is likely much more carnage to come for the fully jabbed. Learn more at [ChemicalViolence.com](https://www.chemicalviolence.com).
